

PORTLAND HARBOUR AUTHORITY LIMITED

Local Notice to Mariners

No 23/2024

Use of Dangerously Weighted Heaving Lines (DWHLs) & line throwing devices.

To Ship Owners, Masters, Agents and their Principals are requested to bring this matter to the attention of vessel masters.

Following the issue of a joint notice by the British Ports Association, British Tug owners Association, Port Skills and Safety, UK Chamber of Shipping, UK Major Ports Group, and UK Marine Pilots Association regarding the unacceptable use of DWHLs in UK ports and harbours, Portland Harbour Authority wishes to advise that the use of DWHLs will not be tolerated.

All Incoming vessels are reminded of their duty to comply with international and domestic codes which are clear and unambiguous on the construction and weight of heaving lines.

The Code of Safe Working Practice (CoSWP) 2024, Section 26.3.6

states:

“To prevent personal injury to those receiving heaving lines, the ‘monkey’s fist’ should be made with rope only and must not contain added weighting material. Safe alternatives include a small high-visibility soft pouch, filled with fast-draining pea shingle or similar, with a weight of not more than 0.5 kg. Under no circumstances is a line to be weighted by items such as shackles, bolts or nuts, or twist locks.”

The use of DWHL when thrown by ship’s crew passing mooring ropes or retrieving a messenger line is dangerous and has caused serious injury. DWHL are a significant safety hazard and have the potential to cause serious or fatal injury and cannot be an accepted activity in UK ports and harbours. Indeed, instances could lead to a fine or criminal prosecution of a ship’s master. Attention is drawn to the MCA Safety Bulletin NO.2 Annexed below.

The use of any form of pneumatic, mechanical or rocket propelled line throwing device for passing of heaving lines or any other non-emergency application is strictly prohibited at all berths and with tugs in the Port of Portland unless in a case of emergency. Ship-owners, ship-managers, ship’s agents and their principals are requested to bring this matter to the attention of vessel masters.

This Notice is issued under the powers vested by the Portland Harbour Revision Order 1997.

LNTM 06/21 is hereby revoked

SAFETY BULLETIN

No. 2

DANGEROUSLY WEIGHTED SHIPS HEAVING LINES

There have been several instances where dangerously weighted heaving lines, including the use of monkey's fists with additional weights inserted into them, have been used resulting in serious injury. Further guidance is contained in Ch 26 section 26.3.5 in the 2015 edition of the Code of Safe Working Practices for Merchant Seafarers.

Vessels using dangerously weighted heaving lines in the UK may be subject to prosecution
